**Years of Experience:** 2 years

**Vacancy:** 1

**Job Type:** Full Time

**Job id:** CAJ6877244

Expired

### Job description:

#### Electronics Quality Control Troubleshooter Responsibilities

- Identify and troubleshoot defects or malfunctions in electronic components, circuits, and systems to ensure proper functionality and performance.
- Create detailed designs and architectures for power equipment, industrial control systems, telecommunication networks, and computer systems, ensuring they meet functional, safety, and performance requirements.

- Maintain detailed records of troubleshooting processes, inspection results, and corrective actions, ensuring transparency and traceability.
- Work closely with design and manufacturing engineers to address recurring issues, suggest improvements, and implement design changes.
- Conduct rigorous testing and validation of systems, including power equipment and telecommunication systems, to ensure reliability, safety, and compliance with industry standards.
- Create and refine testing protocols to improve the efficiency and effectiveness of quality control processes, adapting to new technologies and standards.
- Diagnose and resolve issues during the development and testing phases, optimizing systems for efficiency, performance, and cost-effectiveness
- Provide guidance and training to junior technicians and quality control staff, ensuring consistent application of troubleshooting techniques and quality standards.
- Stay updated on industry regulations and standards, ensuring all products and processes adhere to required quality and safety guidelines.
- Ensure that all systems and equipment developed adhere to relevant industry standards, regulations, and best practices, particularly in safety-critical environments.
- Manage project timelines and budgets, ensuring that design, development, and testing activities are completed on time and within financial constraints.
- Conduct applied research to innovate and improve existing systems, exploring new technologies and methodologies to enhance performance and efficiency.
- Oversee the installation of equipment and systems, ensuring proper setup, configuration, and functionality in line with design specifications.

This is a full-time employment opportunity.

We are looking for an individual with the following qualifications:

- Completion of a two- or three-year college program in electrical or electronics engineering technology, computer engineering technology, telecommunications technology or an equivalent
- 2+ years of work-related experience
- Attention to detail and a good communicator

Compensation: \$34 per hour

Location: Travel to different sites in the GTA will be required. The Head office is located at 155 Rexdale Blvd #502a, Etobicoke, ON M9W 5Z8
