About us:

Stanley Boats specializes in aluminum and steel commercial vessels, providing agencies such as governments, states, provinces, and municipalities with superior marine response vessels. With a strong reputation and innovative approach to integrated design and construction, Stanley Boats is the first choice for new and repeat customers.

Stanley's in-house team design consists of forward-thinking designers and engineering professionals. Stanley engineers comprehend and create new designs, improve existing ones, and do some necessary research and development, though they are not the only R&D group within the company. The team scrutinizes new materials and production processes and continually refines and improves Stanley Boats and manufacturing techniques. Our team is equipped with cutting-edge software to perform analysis to confirm the adequacy of the structure and stability of the boat during the design phase. The design team will examine each new design to verify its compliance with the required standards and regulations.

Stanley's is looking to expand its manufacturing and production by inviting young and experienced professionals to apply for new opportunities.

The position is a key role, and the successful candidate will be a forthcoming self-starter, detail-oriented, and a motivated team player.

Job description:

Assemble, fit, and install aluminum boat components according to drawings and work orders. Operate hand and power tools to cut, shape, weld, and finish aluminum parts. Install systems and fittings, perform sub-assemblies, and ensure all boats meet quality and safety standards. Conduct inspections throughout the build process, follow production schedules, and maintain a clean, organized work area

Duties:

Cut, shape, and fit aluminum parts and assemblies.

Weld, bond, or fasten components to form boat structures.

Install electrical, mechanical, and structural components.

Perform sanding, grinding, and finishing for final assembly.

Follow work orders and drawings to meet customer requirements.

Conduct quality checks and pre-delivery inspections.

Keep workspace organized and assist in meeting production deadlines.

Qualifications/Skills Requirements/Work Experience:

1-2 years of experience working.

High school diploma or equivalent; trade certification or relevant vocational training is an asset.

Previous experience in aluminum fabrication, boat building, or metal assembly preferred.

Proficiency with hand tools, power tools, and basic machinery used in metal fabrication.

Ability to read and interpret blueprints, technical drawings, and work orders.

Strong mechanical aptitude and problem-solving skills.

Attention to detail with a commitment to quality craftsmanship.

Ability to work independently or as part of a production team in a fast-paced environment.

Physical stamina to handle materials and perform manual tasks throughout the shift.

How to Apply:

Please email your cover letter and resume to info@stanleyboats.ca with the heading "Assembler" in the subject line to be considered for the position.

Stanley Boats is an equal opportunity employer. Indigenous persons, youth, newcomers, asylum-based WP holders, and persons with disabilities are welcome to apply.

The company might offer to make necessary arrangements to provide cost-effective accommodations for the selected candidate. Additionally, we will consider covering reasonable relocation expenses to facilitate a smooth transition.

We appreciate all expressed interest in this position; however, only the candidates selected for an interview will be contacted.

To apply for this job vacancy, please send your resume along with a cover letter and a reference letter from your previous employer to the following email: info@stanleyboats.ca
