Job description:

Job description

- The Technical Architect will support the full implementation lifecycle, from scoping to deployment in an evolving ecosystem consisting of clients and partners
- The Technical Architect will be responsible for successfully solutioning the enterprise application E2E, designing and building the Salesforce Industry-specific Financial Services industry solutions
- As a Technical Architect, you will become a deep product expert with Industry Financial Services Cloud applications, and work closely with our sales and delivery teams to ensure customer success
- The Technical Architect maintains an ongoing comprehensive understanding of the cloud-computing ecosystem

Responsibilities:

- Lead functional and technical workshops. Demonstrate leadership skills in designing, delivering, testing, and deploying.
- Expertise in User Journey preparations, User Story reviews, Data Modeling, Apex Design Patterns, LWC, and other modern UI techniques.
- Serve as a trusted advisor to the client driving conversations with their Enterprise Architects and business stakeholders that shape the architectural vision, and establish a program architectural roadmap.
- Manage customer expectations; negotiate solutions to complex problems with both the customer and third-party stakeholders
- Guide our customers, partners, and implementation teams on how best to execute digital transformation with the Salesforce platform using Salesforce Industries.
- Establish trust with the customer s leadership, promoting and/or implementing best practices with SFI and Salesforce
- Build out sophisticated business processes using native Salesforce Industries technology and the toolkit of the Force.com platform and integration tools.
- Work closely with Delivery Managers, Solution Architects, and directly with clients to architect technology solutions to meet client needs
- Highlight and manage risk areas in the solution in a proactive manner, and commit to seeing an issue through to completion.

Qualifications:

- 10+ years of experience in developing technology solutions.
- 3+ years of experience in handling client-facing projects in positions of increasing responsibility in the context of systems development and related business consulting.
- Expertise in one or multiples of Salesforce Financial Services Cloud (FSC), Sales/Service/Experience Cloud, and Vlocity OmniStudio
- Domains- Communications and Media OR Healthcare & Insurance OR Finance OR Generic
- Expertise in one or multiple domains of Banking (retail, commercial, investment, mortgage lending and servicing), Insurance, Wealth & Asset Management
- Integration Architecture (Must have)
- Platform Security (Must have)
- Identity and Access Management / Integration Security
- Sharing and Visibility (Must have)
- Data Architecture and Management (Must have)
- Architectural Design Patterns
- Apex Design Patterns (Must Have)
- Salesforce/Apex, Triggers, Lightning Flows, Lightning, LWC, and experience with modern web and mobile technologies (HTML, CSS, JavaScript, Web Components, others)
- Salesforce Certification Preferred (Admin, Developer, Sales, and Service Clouds, Application Architect)
- OmniStudio Developer/Consultant
